One Week Hybrid FDP Workshop on

Emerging Issues in Global Supply Chain Management

14th - 18th April 2022

Key Resource Person
Prof. Nachiappan Subramanian
Professor of Operations & Logistics Management and Supply Chains (SPRU - Science Policy Research Unit) University of Sussex Business School, UK
Introduction

In the world of business, global supply-chain management is described as the distribution of goods and services over a transnational network in order to maximise profit and decrease waste. Global supply chain management is similar to supply chain management in that it focuses on transnational firms and organisations. Food, jobs, and energy all rely on well-functioning and resilient global supply systems. Unfortunately, the uncertainty created by the COVID-19 pandemic's spread from region to region has made it difficult to recommence worldwide operations. The epidemic has hampered operations at all levels on the supply side. Also, Growing e-commerce and economic stimulus packages have put further strain on airlines, ports, and intermodal transport providers on the demand side. This programme will cover a variety of global supply chain concerns as well as some good case studies for possible solutions to the problems. Group exercises, case presentations and discussion are going to be part of the contact hours.

Objectives of the Hybrid FDP Workshop

◆ To give an in-depth coverage of International Supply Chain and Operations Management in the context of contemporary operations, taking into account the major competitive drivers of efficiency and responsiveness and the solutions enabled by new technologies.

◆ To address the scope, impact and importance of International Supply Chain and Operations Management and the major decisions that need to be made in today’s world of global supply and global markets.

Key takeaways

The participants will be able to analyze global supply chains and management situations using relevant tools, models and frameworks. The ability to design and conduct research in supply chain either individually or in team.
